Subject Index of Vols. 139 and 140

- Acoustic emission analysis**
 study of Al_2O_3 and $\text{NiAl-Al}_2\text{O}_3$ coatings with acoustic emission analysis, 264
- Activated reactive evaporation**
 the parameters of a discharge in an AT-1 biased activated reactive evaporation system for TiN deposition, 33
- Adhesion**
 effect of contamination on mechanical properties and adhesion of magnetron-sputtered TiN coatings on high speed steel substrates, 345
 influence of deposition conditions on the adhesion of sputter-deposited W-C-(Co) films, 631
 manufacture of c-BN films with improved adhesion, 753
 on the adhesion of plasma-deposited TiN on M2 steel, 85
 the influence of titanium interlayers on the adhesion of titanium nitride coatings obtained by plasma-assisted chemical vapour deposition, 71
- Adsorbate-covered surfaces**
 investigation and modification of free and adsorbate-covered surfaces by scanning tunnelling microscopy, 230
- Alumina powders**
 modification of alumina powders by nickel and platinum coating, 185
- Aluminium**
 a comparative study of the corrosion performance of TiN, Ti(B,N) and (Ti,Al)N coatings produced by physical vapour deposition methods, 722
 formation of TiAl_3 layer on titanium alloys, 479
 modification of Cr_2N coatings on Al-3wt.%Mg substrates by xenon irradiation, 159
 structure and properties of ion-plated aluminium bronze films, 687
 study of Al_2O_3 and $\text{NiAl-Al}_2\text{O}_3$ coatings with acoustic emission analysis, 264
 the influence of the reactive gas flow on the properties of AlN sputter-deposited films, 696
 (Ti-Al)N advanced films prepared by arc process, 816
 X-ray studies of Al/ Al_2O_3 multilayered films, 239
 xenon and argon irradiation of TiN films on Al-3wt.%Mg, 165
- Amorphous phases**
 amorphous and crystalline phases in PVD coatings after laser treatment, 655
- Anodic arc technique**
 deposition of diamond-like carbon films by the anodic arc technique, 770
- Anodic vacuum arcs**
 relations between plasma properties and properties of thin copper films produced by an anodic vacuum arc, 825
- Arc evaporation techniques**
 $\text{TiC}_x\text{N}_{1-x}$ coatings by using the arc evaporation technique, 838
- Arc process**
 (Ti-Al)N advanced films prepared by arc process, 816
- Argon**
 averaging effect of radical particle profile by the scanning plasma method in SiH_4 -Ar plasmas, 569
 nitrogen atoms in Ar- N_2 flowing microwave discharges for steel surface nitriding, 9
 spectroscopic investigation of N_2 - H_2 -Ar-TiCl₄-assisted chemical vapour deposition discharge for plasma of TiN, 37
- Argon irradiation**
 xenon and argon irradiation of TiN films on Al-3wt.%Mg, 165
- Atmospheric plasma spraying**
 production of biocompatible coatings by atmospheric plasma spraying, 45
- Auger electron spectroscopy**
 analysis of r.f.-sputtered TiB_2 hard coatings by means of X-ray diffractometry and Auger electron spectroscopy, 259
 sputter cleaning of iron substrates and contamination of TiN coatings studied by *in situ* Auger electron spectroscopy measurements in an ultrahigh vacuum physical vapour deposition apparatus, 339
- Austenitic steels**
 properties of sputtered stainless steel-nitrogen coatings and structural analogy with low temperature plasma nitrided layers of austenitic steels, 702
 sputtering, deposition, and diffusion in ion-nitriding of an austenitic stainless steel, 442
- Bias voltages**
 cathodic arc deposition of diamond-like carbon: effect of bias voltage and deposition angle, 780
- Biocompatibility**
 biocompatibility and corrosion resistance in biological media of hard ceramic coatings sputter deposited on metal implants, 49
 biocompatibility of TiN preclinical and clinical investigations, 58
- Biocompatible coatings**
 production of biocompatible coatings by atmospheric plasma spraying, 45
- Boron**
 a comparative study of the corrosion performance of TiN, Ti(B,N) and (Ti,Al)N coatings produced by physical vapour deposition methods, 722
 analysis of r.f.-sputtered TiB_2 hard coatings by means of X-ray diffractometry and Auger electron spectroscopy, 259
 characterization of microstructure and interfaces in TiC-TiB₂ coatings, 268
 fundamental properties and wear resistance of r.f.-sputtered TiB_2 and Ti(B,N) coatings, 616
 manufacture of c-BN films with improved adhesion, 753
 sputter deposition of wear-resistant coatings within the system Zr-B-N, 670
 two-phase TiC/TiB₂ hard coatings, 609

- Boron nitride films**
evidence for mixed-phase nanocrystalline boron nitride films, 284
- Bronze**
structure and properties of ion-plated aluminium bronze films, 687
- Carbide-forming metals**
the deposition of Ag-C:H films: a tool to understand the role of carbide-forming metals in the Me-C:H deposition process, 764
- Carbon**
cathodic arc deposition of TiN and Zr(C,N) at low substrate temperatures using a pulsed bias voltage, 830
characterization of microstructure and interfaces in TiC-TiB₂ coatings, 268
electrical characterization of plasma-deposited hydrogenated amorphous carbon films, 334
influence of deposition conditions on the adhesion of sputter-deposited W-C-(Co) films, 631
microstructure of diamond films near the interface with WC substrate, 747
preparation and properties of metastable TiC/SiC PVD coatings for wear protection, 676
properties and performance of plasma-assisted physically vapor-deposited TiC coatings, 549
structure and properties of TiC_x layers prepared by plasma-assisted chemical vapour deposition methods, 67
the deposition of Ag-C:H films: a tool to understand the role of carbide-forming metals in the Me-C:H deposition process, 764
TiC_xN_{1-x} coatings by using the arc evaporation technique, 838
two-phase TiC/TiB₂ hard coatings, 609
wear-resistant steel surfaces obtained by high dose implantation of carbon, 150
- Carbon coatings**
sputtered stainless steel-carbon coatings as a substitute for hard electrolytic chromium for potential applications in mechanics, 802
- Carbon layers**
microwave plasma apparatus for deposition of hydrogenated amorphous carbon layers, 784
- Cathodic arc deposition**
cathodic arc deposition of TiN and Zr(C,N) at low substrate temperatures using a pulsed bias voltage, 830
cathodic arc deposition of diamond-like carbon: effect of bias voltage and deposition angle, 780
- Chemical vapour deposition**
characterization of remote plasma-enhanced chemical vapour deposition processes, 715
corrosion-resistant silica coatings obtained by plasma-assisted chemical vapour deposition, 91
development of the quadrupole plasma chemical vapour deposition method for low temperature, high speed coating on an optical fibre, 79
formation of TiN layers by plasma-assisted chemical vapour deposition at temperatures greater than 823 K, 499
hydrogen in plasma-enhanced chemical vapour deposition insulating films, 401
insulation and passivation of three-dimensional substrates by plasma-CVD thin films using silicon-organic compounds, 380
microstructure of diamond films near the interface with WC substrate, 816
plasma impulse chemical vapour deposition—a novel technique for the production of high power laser mirrors, 733
plasma-assisted chemical vapour deposition of hard coatings with metallo-organic compounds, 61
spectroscopic investigation of N₂-H₂-Ar-TiCl₄-assisted chemical vapour deposition discharge for plasma of TiN, 37
structure and properties of TiC_x layers prepared by plasma-assisted chemical vapour deposition methods, 67
the influence of titanium interlayers on the adhesion of titanium nitride coatings obtained by plasma-assisted chemical vapour deposition, 71
tin plasma CVD coatings deposited by different excitation methods for the gas discharge, 534
- Chemiluminescence**
effect of process parameters on the atomic nitrogen concentration as measured by chemiluminescence in a post-discharge nitriding reactor, 132
- Chlorine**
spectroscopic investigation of N₂-H₂-Ar-TiCl₄-assisted chemical vapour deposition discharge for plasma of TiN, 37
- Chromium**
a comparison of the corrosion behaviour and hardness of steel samples (100Cr6) coated with titanium nitride and chromium nitride by different institutions using different deposition techniques, 625
characterization of surface chromium and molybdenum alloying on gray cast iron obtained by the plasma-transferred arc technique, 727
d.c. magnetron sputtering of oxidation-resistant chromium and CrN films monitored by optical emission spectrometry, 126
modification of Cr₂N coatings on Al-3wt.%Mg substrates by xenon irradiation, 159
plasma carburization of wear-resistant high chromium iron, 461
plasma overcarburizing of chromium steels for hot working and wear applications, 454
sputtered stainless steel-carbon coatings as a substitute for hard electrolytic chromium for potential applications in mechanics, 802
- Clinical investigations**
biocompatibility of TiN preclinical and clinical investigations, 58
- Coating-substrate adhesion**
a review of the methods for the evaluation of coating-substrate adhesion, 583
- Coatings**
amorphous and crystalline phases in PVD coatings after laser treatment, 655
- Cobalt**
improved magnetic behaviour of cobalt-based-alloy sputter-target material, 359
influence of deposition conditions on the adhesion of sputter-deposited W-C-(Co) films, 631

Composite layers

- properties of composite layers produced on stainless steel under glow discharge conditions, 505

Contamination

- effect of contamination on mechanical properties and adhesion of magnetron-sputtered TiN coatings on high speed steel substrates, 345

Control

- mechanism of controlling the self-bias voltage in a flat-bed reactor, 24

Cooling speeds

- measurement of temperature distribution and cooling speed in metal on IR radiation, 20

Corrosion

- a comparative study of the corrosion performance of TiN, Ti(B,N) and (Ti,Al)N coatings produced by physical vapour deposition methods, 722
- a comparison of the corrosion behaviour and hardness of steel samples (100Cr6) coated with titanium nitride and chromium nitride by different institutions using different deposition techniques, 625

Corrosion resistance

- biocompatibility and corrosion resistance in biological media of hard ceramic coatings sputter deposited on metal implants, 49

Corrosion-resistant silicon coatings

- corrosion-resistant silica coatings obtained by plasma-assisted chemical vapour deposition, 91

Crystalline phases

- amorphous and crystalline phases in PVD coatings after laser treatment, 655

D.c. magnetron sputtering

- d.c. magnetron sputtering of oxidation-resistant chromium and CrN films monitored by optical emission spectrometry, 126

D.c. pulsed plasma

- low frequency d.c. pulsed plasma for iron nitriding, 15

Deposition

- a comparison of the corrosion behaviour and hardness of steel samples (100Cr6) coated with titanium nitride and chromium nitride by different institutions using different deposition techniques, 625
- cathodic arc deposition of diamond-like carbon: effect of bias voltage and deposition angle, 780
- deposition and properties of diamond thin films, 741
- deposition of diamond-like carbon films by the anodic arc technique, 770
- influence of deposition conditions on the adhesion of sputter-deposited W-C-(Co) films, 631
- Langmuir probe plasma diagnostics during TiN_x deposition, 41
- microwave plasma apparatus for deposition of hydrogenated amorphous carbon layers, 784
- plasma and particle flux characterization of the a-C:H deposition process by ion-assisted methods, 788
- sputtering, deposition, and diffusion in ion-nitriding of an austenitic stainless steel, 442
- the deposition of Ag-C:H films: a tool to understand the role of carbide-forming metals in the Me-C:H deposition process, 764
- the parameters of a discharge in an AT-1 biased activated reactive evaporation system for TiN deposition, 33

Diagnostics

- in-situ* diagnostics/spectroscopy, 1

Diamond films

- deposition and properties of diamond thin films, 741
- forming of a grinding wheel using a dresser with brazed diamond form, 759
- microstructure of diamond films near the interface with WC substrate, 747

Diamond-like carbon

- cathodic arc deposition of diamond-like carbon: effect of bias voltage and deposition angle, 780
- deposition of diamond-like carbon films by the anodic arc technique, 770
- investigations of the structure of a-C:H films, 775
- plasma and particle flux characterization of the a-C:H deposition process by ion-assisted methods, 788
- structural and mechanical properties of niobium-containing amorphous hydrogenated carbon films (Nb-C:H), 795

Dielectric coatings

- production of thin metallic and dielectric coatings by a plasma technique and their investigation, 372

Diffusion

- sputtering, deposition, and diffusion in ion-nitriding of an austenitic stainless steel, 442

Discharge

- the parameters of a discharge in an AT-1 biased activated reactive evaporation system for TiN deposition, 33

Disintegrated solutions

- plasma synthesis of disperse oxide materials from disintegrated solutions, 539

Electron beam heat treatment

- physical vapour deposition of TiN hard coatings with additional electron beam heat treatment, 639

Electron cyclotron resonance

- an electron cyclotron resonance plasma source, 302
- characteristics of ECR plasmas for weakly resonant conditions, 307
- characterization of electron cyclotron process plasma and film deposition, 294
- development of coaxial ECR plasma source for tube inner coating, 312
- microwave plasma apparatus for deposition of hydrogenated amorphous carbon layers, 784

Energetic hydrogen isotope beams

- interaction of graphite with an energetic hydrogen isotope beam, 809

Etching devices

- microwave etching device for reactive ion etching, 408

Fatigue properties

- plasma nitriding improvements of fatigue properties of nodular cast iron crankshafts, 469

Film deposition

- characterization of electron, cyclotron resonance process plasma and film deposition, 294

Flat-bed reactors

- mechanism of controlling the self-bias voltage in a flat-bed reactor, 24

Fluorine

- an XPS study of photoresist surfaces in SF₆-O₂ r.f. plasmas, 385

- Free surfaces
 - investigation and modification of free and adsorbate-covered surfaces by scanning tunnelling microscopy, 230
- Gas discharge
 - tin plasma CVD coatings deposited by different excitation methods for the gas discharge, 534
- Glow discharge
 - experimental study of a glow discharge electron source for soft X-ray spectroscopy, 144
 - properties of composite layers produced on stainless steel under glow discharge conditions, 505
- Gradient thin films
 - synthesis of gradient thin films by ion beam enhanced deposition, 220
- Graphite
 - interaction of graphite with an energetic hydrogen isotope beam, 809
- Growth kinetics
 - growth kinetics and step coverage in plasma deposition of silicon dioxide from organosilicon compounds, 376
- Hard coatings
 - analysis of r.f.-sputtered TiB_2 hard coatings by means of X-ray diffractometry and Auger electron spectroscopy, 259
 - biocompatibility and corrosion resistance in biological media of hard ceramic coatings sputter deposited on metal implants, 49
 - deposition of hard coatings by a hollow-cathode arc evaporation device, 666
 - physical vapour deposition of TiN hard coatings with additional electron beam heat treatment, 639
 - plasma-assisted chemical vapour deposition of hard coatings with metallo-organic compounds, 61
 - tribological properties of r.f.-sputtered titanium-based hard coatings and their behaviour under plastics-processing conditions, 647
 - two-phase TiC/ TiB_2 hard coatings, 609
- High dose implantation
 - wear-resistant steel surfaces obtained by high dose implantation of carbon, 150
- High power laser mirrors
 - plasma impulse chemical vapour deposition—a novel technique for the production of high power laser mirrors, 733
- High speed coatings
 - high speed pipe inner coating using magnetron hollow-cathode discharge in a magnetic field, 682
- High speed steel
 - effect of contamination on mechanical properties and adhesion of magnetron-sputtered TiN coatings on high speed steel substrates, 345
 - stitching TiN films on high speed steel substrates by ion beams, 193
- High-thermal-resistant dielectric coatings
 - high-thermal-resistant dielectric coating deposited by plasma polymerization, 120
- Hollow cathodes
 - deposition of hard coatings by a hollow-cathode arc evaporation device, 666
 - high speed pipe inner coating using magnetron hollow-cathode discharge in a magnetic field, 682
- influence of the phase transformation of a metal on hollow cathode discharge characteristics, 29
- Hydrogen
 - averaging effect of radical particle profile by the scanning plasma method in SiH_4 -Ar plasmas, 569
 - hydrogen in plasma-enhanced chemical vapour deposition insulating films, 401
 - spectroscopic investigation of N_2 - H_2 -Ar- TiCl_4 -assisted chemical vapour deposition discharge for plasma of TiN, 37
 - the deposition of Ag-C:H films: a tool to understand the role of carbide-forming metals in the Me-C:H deposition process, 764
- Hydrogenated amorphous carbon films
 - electrical characterization of plasma-deposited hydrogenated amorphous carbon films, 334
- Hydrogenated amorphous silicon
 - thin film technology based on hydrogenated amorphous silicon, 319
- Inclined electrodes
 - development of large area sputter-coating method using magnetized a.c. plasmas with inclined electrodes, 563
- Insulation
 - hydrogen in plasma-enhanced chemical vapour deposition insulating films, 401
 - insulation and passivation of three-dimensional substrates by plasma-CVD thin films using silicon-organic compounds, 380
- Interface problems
 - interface problems in metallurgical coatings, 249
- Intrinsic oxide layers
 - formation of intrinsic oxide layers by ion implantation of silicon and titanium in the low kiloelectronvolt regime, 214
- Iodine
 - thin conductive films made by plasma polymerization of 2-chloroacrylonitrile in the presence of iodine, 356
- Ion beams
 - plasma diagnostics of an ECR ion beam system, 6
 - stitching TiN films on high speed steel substrates by ion beams, 193
 - synthesis of gradient thin films by ion beam enhanced deposition, 220
- Ion implantation
 - formation of intrinsic oxide layers by ion implantation of silicon and titanium in the low kiloelectronvolt regime, 214
 - influence of temperature on nitrogen ion implantation of Incoloy alloys 908 and 909, 179
 - plasma immersion ion implantation of steels, 171
 - the economics of ion implantation, 207
- Ion nitriding
 - application of ion nitriding to wire-electrical-discharge-machined blanking dies, 486
- Ion-beam-assisted deposition
 - applications of ion-beam-assisted deposition, 199
 - ion-assisted deposition with a new plasma source, 523
- Ion-beam-enhanced deposition
 - characterization of TiN coatings prepared by ion-beam-enhanced deposition, 225
- Ion-plated films
 - structure and properties of ion-plated aluminium bronze films, 687

IR radiation

- measurement of temperature distribution and cooling speed in metal on IR radiation, 20

Iron

- characterization of surface chromium and molybdenum alloying on gray cast iron obtained by the plasma-transferred arc technique, 727
- low frequency d.c. pulsed plasma for iron nitriding, 15
- plasma carburization of wear-resistant high chromium iron, 461
- sputter cleaning of iron substrates and contamination of TiN coatings studied by *in situ* Auger electron spectroscopy measurements in an ultrahigh vacuum physical vapour deposition apparatus, 339

Langmuir probes

- Langmuir probe plasma diagnostics during TiN_x deposition, 41

Large area sputter-coatings

- development of a large area sputter-coating method using a new magnetron discharge, 691

Laser treatment

- amorphous and crystalline phases in PVD coatings after laser treatment, 655

Low energy particle bombardment

- zirconia thin film deposition on silicon by reactive gas flow sputtering: the influence of low energy particle bombardment, 528

Low frequency r.f. glow discharges

- an investigation into the effects of plasma bombardment anisotropy in low frequency r.f. glow discharges, 517

Magnesium

- modification of Cr₂N coatings on Al-3wt.%Mg substrates by xenon irradiation, 159
- xenon and argon irradiation of TiN films on Al-3wt.%Mg, 165

Magnetic fields

- high speed pipe inner coating using magnetron hollow-cathode discharge in a magnetic field, 682

Magnetism

- improved magnetic behaviour of cobalt-based-alloy sputter-target material, 359

Magnetized a.c. plasmas

- development of large area sputter-coating method using magnetized a.c. plasmas with inclined electrodes, 563

Magnetron deposition systems

- dynamic interactions in the physical properties of magnetron deposition systems, 510

Magnetron discharges

- development of a large area sputter-coating method using a new magnetron discharge, 691

Martensitic hot-worked tool steel

- texture analysis of martensitic hot-worked tool steel H13 coated with TiN by physical vapour deposition, 242

Metal alkoxides

- low temperature remote plasma-enhanced deposition of thin metal oxide films by decomposition of metal alkoxides, 394

Metal implants

- biocompatibility and corrosion resistance in biological media of hard ceramic coatings sputter deposited on metal implants, 49

Metallic coatings

- formation of metallic coatings on non-heated substrates by the impulse plasma method, 709

Metallo-organic compounds

- plasma-assisted chemical vapour deposition of hard coatings with metallo-organic compounds, 61

Metallurgical coatings

- interface problems in metallurgical coatings, 249

Microstructure

- characterization of microstructure and interfaces in TiC-TiB₂ coatings, 268
- microstructure of diamond films near the interface with WC substrate, 747
- plasma heat treatment of steel: microstructure, properties and applications, 474

Microwave discharges

- nitrogen atoms in Ar-N₂ flowing microwave discharges for steel surface nitriding, 9
- nitrogen microwave discharge as a source of excited neutral species for possible surface treatment, 494

Microwave plasma

- microwave plasma apparatus for deposition of hydrogenated amorphous carbon layers, 809

Molybdenum

- characterization of surface chromium and molybdenum alloying on gray cast iron obtained by the plasma-transferred arc technique, 727

Multilayered films

- X-ray studies of Al/Al₂O₃ multilayered films, 239

Multiphase films

- Ti-N films created in close vicinity of transition from α -Ti(N) to δ -TiN_x phase, 660

Nickel

- modification of alumina powders by nickel and platinum coating, 185
- study of Al₂O₃ and NiAl-Al₂O₃ coatings with acoustic emission analysis, 264

Niobium

- structural and mechanical properties of niobium-containing amorphous hydrogenated carbon films (Nb-C:H), 795

Nitride layers

- influence of pulsed d.c.-glow-discharge on the phase constitution of nitride layers during plasma nitrocarburizing of sintered materials, 448

Nitrogen

- a comparative study of the corrosion performance of TiN, Ti(B,N) and (Ti,Al)N coatings produced by physical vapour deposition methods, 722
- a comparison of the corrosion behaviour and hardness of steel samples (100Cr6) coated with titanium nitride and chromium nitride by different institutions using different deposition techniques, 625
- biocompatibility of TiN preclinical and clinical investigations, 58
- cathodic arc deposition of TiN and Zr(C,N) at low substrate temperatures using a pulsed bias voltage, 831
- characterization of TiN coatings prepared by ion-beam-enhanced deposition, 225
- characterization of TiN coatings deposited on plasma nitrided tool steel surfaces, 554
- d.c. magnetron sputtering of oxidation-resistant chromium

- and CrN films monitored by optical emission spectrometry, 126
- effect of contamination on mechanical properties and adhesion of magnetron-sputtered TiN coatings on high speed steel substrates, 345
- effect of process parameters on the atomic nitrogen concentration as measured by chemiluminescence in a post-discharge nitriding reactor, 132
- formation of TiN layers by plasma-assisted chemical vapour deposition at temperatures greater than 823 K, 499
- fundamental properties and wear resistance of r.f.-sputtered TiB₂ and Ti(B,N) coatings, 616
- influence of temperature on nitrogen ion implantation of incoloy alloys 908 and 909, 179
- Langmuir probe plasma diagnostics during TiN_x deposition, 41
- manufacture of c-BN films with improved adhesion, 753
- modification of Cr₂ coatings on Al-3wt.%Mg substrates by xenon irradiation, 159
- nitrogen atoms in Ar-N₂ flowing microwave discharges for steel surface nitriding, 9
- nitrogen microwave discharge as a source of excited neutral species for possible surface treatment, 494
- on the adhesion of plasma-deposited TiN on M2 steel, 85
- physical vapour deposition of TiN hard coatings with additional electron beam heat treatment, 639
- plasma surface engineering of low alloy steel, 419
- properties of sputtered stainless steel-nitrogen coatings and structural analogy with low temperature plasma nitrided layers of austenitic steels, 702
- spectroscopic investigation of N₂-H₂-Ar-TiCl₄-assisted chemical vapour deposition discharge for plasma of TiN, 37
- sputter cleaning of iron substrates and contamination of TiN coatings studied by *in situ* Auger electron spectroscopy measurements in an ultrahigh vacuum physical vapour deposition apparatus, 339
- sputter deposition of wear-resistant coatings within the system Zr-B-N, 670
- stitching TiN films on high speed steel substrates by ion beams, 193
- texture analysis of martensitic hot-worked tool steel H13 coated with TiN by physical vapour deposition, 242
- the influence of the reactive gas flow on the properties of AlN sputter-deposited films, 696
- the parameters of a discharge in an AT-1 biased activated reactive evaporation system for TiN deposition, 33
- (Ti-Al)N advanced films prepared by arc process, 816
- Ti-N films created in close vicinity of transition from α -Ti(N) to δ -TiN_x phase, 660
- TiC_xN_{1-x} coatings by using the arc evaporation technique, 755
- xenon and argon irradiation of TiN films on Al-3wt.%Mg, 165
- Non-heated substrates
 - formation of metallic coatings on non-heated substrates by the impulse plasma method, 709
- Optical emission spectrometry
 - d.c. magnetron sputtering of oxidation-resistant chromium and CrN films monitored by optical emission spectrometry, 126
- Optical fibres
 - development of the quadrupole plasma chemical vapour deposition method for low temperature, high speed coating on an optical fibre, 79
- Organosilicon compounds
 - growth kinetics and step coverage in plasma deposition of silicon dioxide from organosilicon compounds, 376
 - insulation and passivation of three-dimensional substrates by plasma-CVD thin films using silicon-organic compounds, 380
- Oxide materials
 - plasma synthesis of disperse oxide materials from disintegrated solutions, 539
- Oxygen
 - an XPS study of photoresist surfaces in SF₆-O₂ r.f. plasmas, 385
 - study of Al₂O₃ and NiAl-Al₂O₃ coatings with acoustic emission analysis, 264
 - X-ray studies of Al/Al₂O₃ multilayered films, 239
 - XPS investigation of polymer residues in reactive ion etching of SiO₂ over poly-silicon, 364
- Oxygen microwave discharge
 - surface treatment of polypropylene by oxygen microwave discharge, 103
- Particle flux characterization
 - plasma and particle flux characterization of the a-C:H deposition process by ion-assisted methods, 788
- Particle flux parameters
 - correlation of particle flux parameters with the properties of thin tungsten carbide films, 137
- Passivation
 - insulation and passivation of three-dimensional substrates by plasma-CVD thin films using silicon-organic compounds, 380
- Phase constitutions
 - influence of pulsed d.c.-glow-discharge on the phase constitution of nitride layers during plasma nitrocarburizing of sintered materials, 448
- Phase transformation
 - influence of the phase transformation of a metal on hollow cathode discharge characteristics, 29
- Physical vapour deposition
 - a coating thickness uniformity model for physical vapour deposition systems—further validity tests, 576
 - a comparative study of the corrosion performance of TiN, Ti(B,N) and (Ti,Al)N coatings produced by physical vapour deposition methods, 722
 - amorphous and crystalline phases in PVD coatings after laser treatment, 655
 - interface problems in metallurgical coatings, 249
 - physical vapour deposition of TiN hard coatings with additional electron beam heat treatment, 639
 - preparation and properties of metastable TiC/SiC PVD coatings for wear protection, 676
 - properties and performance of plasma-assisted physically vapor-deposited TiC coatings, 549
 - sputter cleaning of iron substrates and contamination of TiN coatings studied by *in situ* Auger electron spectroscopy measurements in an ultrahigh vacuum physical vapour deposition apparatus, 339
 - texture analysis of martensitic hot-worked tool steel H13 coated with TiN by physical vapour deposition, 242

- Plasma bombardment anisotropy
 - an investigation into the effects of plasma bombardment anisotropy in low frequency r.f. glow discharges, 517
- Plasma carburization
 - influence of pulsed d.c.-glow-discharge on the phase constitution of nitride layers during plasma nitrocarburizing of sintered materials, 448
 - plasma carburization of wear-resistant high chromium iron, 461
 - plasma overcarburizing of chromium steels for hot working and wear applications, 454
- Plasma characterization
 - plasma and particle flux characterization of the a-C:H deposition process by ion-assisted methods, 788
- Plasma deposition
 - electrical characterization of plasma-deposited hydrogenated amorphous carbon films, 334
 - growth kinetics and step coverage in plasma deposition of silicon dioxide from organosilicon compounds, 376
 - on the adhesion of plasma-deposited TiN on M2 steel, 85
 - plasma deposition of superconducting films, 352
 - production of thin metallic and dielectric coatings by a plasma technique and their investigation, 372
- Plasma diagnostics
 - Langmuir probe plasma diagnostics during TiN_x deposition, 41
 - plasma diagnostics of an ECR ion beam system, 6
 - structural study of titanium nitride coating interfaces related to plasma diagnostics, 276
- Plasma heat treatment
 - plasma heat treatment of steel: microstructure, properties and applications, 474
- Plasma immersion ion implantation
 - plasma immersion ion implantation of steels, 171
- Plasma nitriding
 - characterization of TiN coatings deposited on plasma nitrided tool steel surfaces, 554
 - plasma nitriding improvements of fatigue properties of nodular cast iron crankshafts, 469
 - plasma nitriding in industry—problems, new solutions and limits, 435
 - plasma surface engineering of low alloy steel, 419
 - properties of sputtered stainless steel-nitrogen coatings and structural analogy with low temperature plasma nitrided layers of austenitic steels, 702
- Plasma polymerization
 - a reactor for plasma polymerization on polymer films, 110
 - high-thermal-resistant dielectric coating deposited by plasma polymerization, 120
 - thin conductive films made by plasma polymerization of 2-chloroacrylonitrile in the presence of iodine, 356
- Plasma properties
 - relations between plasma properties and properties of thin copper films produced by an anodic vacuum arc, 742
- Plasma synthesis
 - plasma synthesis of disperse oxide materials from disintegrated solutions, 539
- Plasma-enhanced deposition
 - low temperature remote plasma-enhanced deposition of thin metal oxide films by decomposition of metal alkoxides, 394
- Plasma-transferred arc technique
 - characterization of surface chromium and molybdenum alloying on gray cast iron obtained by the plasma-transferred arc technique, 727
- Plastics-processing equipment
 - tribological properties of r.f.-sputtered titanium-based hard coatings and their behaviour under plastics-processing conditions, 647
- Platinum coatings
 - modification of alumina powders by nickel and platinum coating, 185
- Polymers
 - a reactor for plasma polymerization on polymer films, 110
 - XPS investigation of polymer residues in reactive ion etching of SiO₂ over poly-silicon, 364
- Polypropylene
 - surface treatment of polypropylene by oxygen microwave discharge, 103
- Post-discharge nitriding reactor
 - effect of process parameters on the atomic nitrogen concentration as measured by chemiluminescence in a post-discharge nitriding reactor, 132
- Preclinical investigations
 - biocompatibility of TiN preclinical and clinical investigations, 58
- Pulsed bias voltages
 - cathodic arc deposition of TiN and Zr(C,N) at low substrate temperatures using a pulsed bias voltage, 830
- Pulsed d.c.-glow-discharge
 - influence of pulsed d.c.-glow-discharge on the phase constitution of nitride layers during plasma nitrocarburizing of sintered materials, 448
- R.f.-sputtering
 - fundamental properties and wear resistance of r.f.-sputtered TiB₂ and Ti(B,N) coatings, 616
 - tribological properties of r.f.-sputtered titanium-based hard coatings and their behaviour under plastics-processing conditions, 647
- Radical particles
 - averaging effect of radical particle profile by the scanning plasma method in SiH₄-Ar plasmas, 569
- Reactive gas flow
 - the influence of the reactive gas flow on the properties of AlN sputter-deposited films, 696
 - zirconia thin film deposition on silicon by reactive gas flow sputtering: the influence of low energy particle bombardment, 528
- Reactive ion etching
 - microwave etching device for reactive ion etching, 408
 - simulation of reactive ion-etching processes considering sheath dynamics, 412
 - XPS investigation of polymer residues in reactive ion etching of SiO₂ over poly-silicon, 364
- Scanning tunnelling microscopy
 - investigation and modification of free and adsorbate-covered surfaces by scanning tunnelling microscopy, 230
- Self-bias voltages
 - mechanism of controlling the self-bias voltage in a flat-bed reactor, 24
- Sheath dynamics
 - simulation of reactive ion-etching processes considering sheath dynamics, 412
- Sheet-metal-forming conditions
 - tribological properties and wear behaviour of sputtered

titanium-based hard coatings under sheet-metal-forming conditions, 593

Silicon

averaging effect of radical particle profile by the scanning plasma method in SiH_4 -Ar plasmas, 569

formation of intrinsic oxide layers by ion implantation of silicon and titanium in the low kiloelectronvolt regime, 214

preparation and properties of metastable TiC/SiC PVD coatings for wear protection, 676

thin film technology based on hydrogenated amorphous silicon, 319

XPS investigation of polymer residues in reactive ion etching of SiO_2 over poly-silicon, 364

zirconia thin film deposition on silicon by reactive gas flow sputtering: the influence of low energy particle bombardment, 528

Silicon dioxide

growth kinetics and step coverage in plasma deposition of silicon dioxide from organosilicon compounds, 376

Silver

the deposition of Ag-C:H films: a tool to understand the role of carbide-forming metals in the Me-C:H deposition process, 764

Soft X-ray spectroscopy

experimental study of a glow discharge electron source for soft X-ray spectroscopy, 144

Spectroscopy

In-situ diagnostics/spectroscopy, 1

influence of deposition conditions on the adhesion of sputter-deposited W-C-(Co) films, 631

Sputter deposition

biocompatibility and corrosion resistance in biological media of hard ceramic coatings sputter deposited on metal implants, 49

sputter deposition of wear-resistant coatings within the system Zr-B-N, 670

Sputter-coating

development of large area sputter-coating method using magnetized a.c. plasmas with inclined electrodes, 563

Sputter-deposited films

the influence of the reactive gas flow on the properties of AlN sputter-deposited films, 696

Sputter-targets

improved magnetic behaviour of cobalt-based-alloy sputter-target material, 359

Sputtered coatings

properties of sputtered stainless steel-nitrogen coatings and structural analogy with low temperature plasma nitrided layers of austenitic steels, 702

Sputtered titanium-based hard coatings

tribological properties and wear behaviour of sputtered titanium-based hard coatings under sheet-metal-forming conditions, 593

Sputtering

a new sputter process for hard coating of large machine parts at low temperatures, 290

analysis of r.f.-sputtered TiB_2 hard coatings by means of X-ray diffractometry and Auger electron spectroscopy, 259

effect of contamination on mechanical properties and adhesion of magnetron-sputtered TiN coatings on high speed steel substrates, 345

sputter cleaning of iron substrates and contamination of

TiN coatings studied by *in situ* Auger electron spectroscopy measurements in an ultrahigh vacuum physical vapour deposition apparatus, 339

sputtering, deposition, and diffusion in ion-nitriding of an austenitic stainless steel, 442

Stitching

stitching TiN films on high speed steel substrates by ion beams, 193

Sulphur

an XPS study of photoresist surfaces in SF_6 - O_2 r.f. plasmas, 385

Superconducting films

plasma deposition of superconducting films, 352

Surface alloying

characterization of surface chromium and molybdenum alloying on gray cast iron obtained by the plasma-transferred arc technique, 727

Surface nitriding

nitrogen atoms in Ar- N_2 flowing microwave discharges for steel surfaces nitriding, 9

Surface treatment

nitrogen microwave discharge as a source of excited neutral species for possible surface treatment, 494

Temperature distributions

measurement of temperature distribution and cooling speed in metal on IR radiation, 20

Texture analysis

texture analysis of martensitic hot-worked tool steel H13 coated with TiN by physical vapour deposition, 242

Thin conductive films

thin conductive films made by plasma polymerization of 2-chloroacrylonitrile in the presence of iodine, 356

Thin copper films

Relations between plasma properties and properties of thin copper films produced by an anodic vacuum arc, 825

Thin film deposition

zirconia thin film deposition on silicon by reactive gas flow sputtering: the influence of low energy particle bombardment, 528

Thin metal oxide films

low temperature remote plasma-enhanced deposition of thin metal oxide films by decomposition of metal alkoxides, 394

Thin metallic coatings

production of thin metallic and dielectric coatings by a plasma technique and their investigation, 372

Three-dimensional substrates

insulation and passivation of three-dimensional substrates by plasma-CVD thin films using silicon-organic compounds, 380

Tin plasma

tin plasma CVD coatings deposited by different excitation methods for the gas discharge, 534

Titanium

a comparative study of the corrosion performance of TiN, Ti(B,N) and (Ti,Al)N coatings produced by physical vapour deposition methods, 722

a comparison of the corrosion behaviour and hardness of steel samples (100Cr6) coated with titanium nitride and chromium nitride by different institutions using different deposition techniques, 625

analysis of r.f.-sputtered TiB_2 hard coatings by means of

- X-ray diffractometry and Auger electron spectroscopy, 259
- biocompatibility of TiN preclinical and clinical investigations, 58
- cathodic arc deposition of TiN and Zr(C,N) at low substrate temperatures using a pulsed bias voltage, 825
- characterization of microstructure and interfaces in TiC-TiB₂ coatings, 268
- characterization of TiN coatings prepared by ion-beam-enhanced deposition, 225
- characterization of TiN coatings deposited on plasma nitrided tool steel surfaces, 554
- effect of contamination on mechanical properties and adhesion of magnetron-sputtered TiN coatings on high speed steel substrates, 345
